

Survey Intelligence InSAR +

taking ground displacement analyses to the next level

Providing the missing link between EO data and geology

1. Understand the **cause** of displacement
2. Identify the trend to **forecast** evolution
3. Increase **resolution** by smart gridding technology
4. **3D deformation**: vertical and horizontal relative displacement

Horizon Calls

Monitoring underground activities for impact on environment & society

Increase safety and reduce risk

1. CCS: CO2 storage
2. Hydrogen storage
3. Gas storage
4. Geothermal energy
